EduOS Cameroon — Procurement Plan (Skeleton)

Document ID	EDUOS-PRO-001
Version	1.0 (skeleton — thresholds and review types finalized with the financier's procurement specialist at appraisal, per the applicable framework: World Bank Procurement Regulations for IPF Borrowers or national code for government-funded lines)
Owner	PMU procurement officer (PRC 1.5)

1. Procurement principles

Follows the financier's framework where donor-funded, Cameroon's public procurement code where government-funded; all packages under open competition unless a documented justification applies (the developer-selection question is PRC item 1.3 — it is decided *before* this plan executes, not inside it). Every package below states method, indicative value, and timing keyed to the Master Plan.

2. Procurement packages

#	Package	Indicative value (bn FCFA)	Method	Timing (MIP ref)	Key requirements baked in
P1	Platform development & Phase-I implementation services	2.87	Per PRC 1.3 outcome: QCBS competitive / justified direct / phased hybrid	Contract at T0	Source escrow, knowledge-transfer milestones, CI boundary checks contractual (G12), FRS acceptance criteria as contract acceptance
P2	School devices — wave 1 (pilot + Phase II option)	1.97 (both tiers)	International competitive bidding, class-spec (ADR-11: MIL-STD/IP68/battery ≥15,000 mAh for rugged tier; Blackview Active 8 Pro as reference, ≤3 models) with option clause for wave 2/3 quantities at award prices	Tender M8, award M10, delivery M14 (MIP §5 track 2)	Battery replaceability & take-back scored (ESS doc 12 §2.3); 3-yr parts availability; MDM enrolment service included; customs/duty exemption pre-arranged (Phase 0-D)
P3	Solar charging kits	0.24	National competitive bidding	With P2 timeline, deepest-remote subset per NSR tiers	Installation + 2-yr maintenance included; end-of-life per e-waste plan
P4	Division/sub-division office kits	0.19	National competitive bidding	M6–M10	Standard laptops + laser scanners (NFR-NWD-04)
P5	Hosting infrastructure & DR	0.35 capex + recurrent	Limited competition among national DC operators + framework for bandwidth	Phase 0-E agreement, equip-	FCFA-denominated; open-standard exit (NFR-NTR-09)

#	Package	Indicative value (bn FCFA)	Method	Timing (MIP ref)	Key requirements baked in
				ment at T0+3m	
P6	Training services & venues (cascade delivery)	within 1.78	Framework agreements per region	ToT M8; waves per MIP track 3	Female-participation and child-safeguarding clauses (doc 12 §3.3/§5)
P7	Data-campaign field services	within 0.46	National competition / direct with INS if justified	M3–M8	ESS2 labor terms; identity-proofing protocol (ADR-10 tie-in)
P8	Independent verification & M&E audit	0.29	QCBS, must be independent of P1 vendor	Annual from pilot year	400-school sample design (MEF §3.1)
P9	External penetration tests (×2)	within P1 or separate small contract	Direct/limited (specialized)	M11 and pre-Phase III (MIP)	Must be independent of P1 vendor
P10	E-waste treatment services	≤0.01/yr	National competition among licensed operators	Contract before first replacement cycle (Y3)	Certificates of destruction per lot (doc 12 §2.2)
P11	Conflict-sensitivity assessment	small consultancy	Direct/limited (specialized, field access required)	Phase 0	Doc 12 §4; informs Phase III wave design

3. Standing rules

1. **No package proceeds whose upstream data dependency is open** — P2 waits for tier counts (data campaign M8), by design (MIP §7 spine).
2. **Prior review thresholds** set at appraisal; until then all packages ≥ 0.5 bn FCFA treated as prior-review.

3. QR-at-press labelling is **not** a package here — it is a clause in the ministries' existing print contracts (BUD §5.5, Phase 0-H), at publisher cost within regulated pricing.
4. Contract variations above 10% of package value require Steering Committee approval (the CCB, MIP §8) and contingency-line accounting.
5. All awards published (national procurement portal + programme site) — allocation transparency is a programme value the procurement must model.
